FOR IMMEDIATE RELEASE

## Universal Valve Co. Unveils New Bollard Covers

(Elizabeth, NJ) December 11, 2009 – Universal Valve Co. recently announced the release of its model number 1984-BC, bollard covers. Bollard covers enhance and protect the appearance of bumper post steel bollards in all indoor and outdoor applications.

Universal Valve offers a wide range of bollard cover sizes to fit any application. All of Universal's bollard covers are constructed of 1/8" thick Polyethylene and 3M #680 reflective tape, ready to be installed. Universal's bollard covers come in a variety of height sizes to slide over 4", 6", 8", & 10" bollards.

Universal Valve's bollard covers are designed to enhance the appearance of steel bollards. Universal Valve offers ten bollard cover colors with seven reflective tape options to match any existing store facade. This allows for bollard covers to be customized to fit in with any application at gas stations, banks, c-stores, warehouses, and retail locations. Universal's GripperTabs™ installation is the fastest and easiest way to secure bollard covers. This installation saves time and provides a great alternative to painting steel bollards.

Universal Valves bollard covers are available now and can be ordered through anyone of their local distributors located across the world. Bollard covers come ready to install out of the box. Universal bollard covers are easily replaceable and require no maintenance.
